

Jump Room

A jump room is meant for times that require extreme focus, so it’s only natural that they offer both privacy as well everything you need to get work done. But with workers often dropping in spontaneously, you need a space that can be instantly productive.

The **Webex Room Navigator** sits just outside the jump room door and helps orchestrate it all, displaying room availability, as well as information like when the room was last cleaned.

Upon entering, the **Webex Desk** gives you a powerful all-in-one collaboration device for getting work done. And with **RoomOS 11**, you can easily swipe to access web apps, content on your laptop, your calendar, or your meeting details.

And since this is a room centered around productivity, Webex now supports embedding 30+ of your favorite apps, like Smartsheet or Miro, directly into your shared spaces and meetings with a simple click.

And finally, with **Meraki**, you no longer need to worry about your bandwidth. You’ll get better, stronger, and more secure Wi-Fi, even through all those video meetings.

Product List
